Personal PA™ Value Pack System with NEW T27 Transmitter!

Model PPA VP
72-76 MHz

The PPA Value Pack System features the new T27 transmitter with LED display panel and push-button channel selection for trouble-free operation. The speaker simply connects a microphone with 3.5mm plug into the unit to broadcast their voice. Alternatively, the unit can connect to a sound system through a line-level (RCA) jack to broadcast music or other audio service.

For more information on how a PPA Value Pack System can benefit your facility, contact us today:
